

Create a Style

To Do

1. Create a new style. Use the header, footer and CSS files.
2. Enable the style to the site structure.

The screenshot shows a dialog box with tabs for 'General', 'Header', 'Footer', 'Stylesheet', and 'T4 Tag'. The 'General' tab is active. It contains the following fields:

- Style Name: Home style
- Content Type: text/html
- Description: Style for home page
- Extension: Default

There are 'Add' and 'Cancel' buttons at the bottom right of the dialog box.

Notes

1. Select **Styles** from the **Assets** menu.
2. Locate your Group and click **Create New**.
3. Enter a name in **Style Name**.
4. Enter text/html (or relevant type) in **Content Type**.
5. Enter a description in **Description**.
6. Select the **Header** tab and add the relevant code for the header.
7. Select the **Footer** tab and add the relevant code for the footer.
8. Select the **Stylesheet** tab. Copy the code from the CSS file into the field – alternatively upload the CSS file into the Media Library.
9. Click **Add** to save the style.
10. To enable the style, navigate to your section from the main hierarchy page.
11. Hover over the arrow next to your section and select **Modify**.
12. Select the **Styles** tab.
13. Select your Style from the drop-down menu.
14. Click **Update**.
